Mike – thanks for picking up the Lumex. I will let WVDEP know that our Lumex will be back in Wheeling the week of 1/21/14 – so they can get theirs calibrated. They typically have quick turnaround on their calibration but with the current chemical spill – I’m not sure when Rusty will be in the office to send theirs out.

I’m sure WVDEP will have theirs back by February if not March.

Debbie and Melissa,

I contacted Greg and the Lumex is at the ESC. He is done with it and I can pick up on Thursday

when I go down there. I can bring it to Wheeling when I come down. That unit is not due for calibration until April but I'd like to get it in sooner if possible, so maybe WVDEP can get theirs in tout de suite? If you'll remember we're having trouble with the lamp and I'd like to get the lamp replaced. The Boothwyn unit is in now so no hurry.

Thanks,

Mike Davis

Subject: Location of Mercury Lumex Analyzer

Mike and Melissa

I normally coordinate with WVDEP on the availability of our Mercury Lumex Analyzer when they send theirs in for calibration and vice versa.

They are getting ready to send their Lumex in for calibration – is the Wheeling Lumex still out in Ft Meade with Greg Ham or is it in the Equipment room?

Just checking so I can respond back to WVDEP with the correct status

Thanks

Debbie Lindsey
